

Instructions:

1. You will need to make an appointment for this test.
2. When you receive your two Dexamethasone tablets (each 0.5mg), you will be asked for a pre tablet blood sample. This should be collected between 8.00 - 9.00 am.
3. At 11.00 pm on the night before the post tablet blood test, take the two Dexamethasone tablets with some water.
4. In the morning, between 8.00 - 9.00 am go back to the collection centre and give a post tablet blood sample. This completes the test.
